

# Take & Make

## Kites!

### Materials Provided:

- 2 Cupcake Liners
- Light Blue Cardstock
- White Cardstock
- Color Cardstock to match your cupcake liners
- Yarn

### Additional Materials Needed:

- Scissors
- Glue (both a glue stick & regular Elmer's glue if possible)

### Directions

- Start by cutting out cloud shapes from your white cardstock paper and glue them onto your blue sheet of cardstock paper.
- Gently flatten out the cupcake liners. Then, fold in two sides of the liners to create a point. Use a glue stick to put some glue under the little folded flaps to hold them in place.
- Glue your 2 cupcake liners together, making a diamond shape with a point on each end.
  - Below is a picture of the back of the cupcake liners after gluing them together.
- Glue your kite onto your blue sheet of cardstock paper.

- Make a line of glue from the bottom of your kite to the end of your paper, and add your white string onto the line of glue.
  - You might have to trim your yarn if there's a lot of extra hanging off the page.
- Cut out 6 small hearts from the remaining piece of colored cardstock.
  - The color of the paper may vary from kit-to-kit to match the cupcake liners provided.
- Once the yarn is dried, glue the little hearts onto your white string with 2 heart points facing each other to make a small bow.
